In Potential Roof
Replacement Exposure***

When hail carries this level of risk, Performance that Protects™ matters.

- Homeowners may avoid paying a deductible after a hailstorm
- Premium discounts from homeowner's insurer may be available

The Industry's First Hail Warranted‡ Asphalt Shingle System

When others can only say Class 4 Rated, HailGuard™ shingles are engineered to GO FURTHER by providing REAL hail coverage backed by REAL science†

HailGuard™ shingles are built with ImpactCore™ technology: Next-generation polymer modified asphalt and advanced fiberglass mat engineering designed to withstand hail impacts and deliver enhanced storm resistance.

TAMKO®

† "Beyond Class 4" is a marketing term and does not refer to any official UL impact rating. HailGuard™ shingles are classified by UL for compliance with UL 2218 Class 4 impact resistance. UL 2218 utilizes a dropped steel ball which may not correlate with real world rooftop experience with the impact of storm driven hail or other objects. Currently, UL testing does not include classifications higher than Class 4; however, TAMKO has successfully tested HailGuard™ shingles at impact energies exceeding UL 2218 Class 4. See TAMKO's HailGuard™ Extended Limited System Warranty for complete terms and details.

‡ As of March 2026. See TAMKO's HailGuard™ Extended Limited System Warranty for complete terms and details.

* 160 MPH wind warranty requires TAMKO® starter and TAMKO® hip and ridge.

See TAMKO's full High Wind Application Instructions for all requirements and restrictions.

** Please consult TAMKO's Limited Warranty and Application Instructions for requirements.
